

Black Rubber Wiring Harness Protector

KINGTOM is a major manufacturer and supplier of rubber products in China. Car Rubber Wiring Harness Protector, In recent years, the requirements for automobile sealing performance are becoming higher and higher. Elastic rubber parts are used to ensure good waterproof, wire harness protection, wire harness smooth transition and other properties.

KINGTOM is a major manufacturer and supplier of rubber products in China. **Car Rubber Wiring Harness Protector**, In recent years, the requirements for automobile sealing performance are becoming higher and higher. Elastic rubber parts are used to ensure good waterproof, wire harness protection, wire harness smooth transition and other properties.

Product Parameter of the Black Rubber Wiring Harness Protector:

- ①Product name: **Black Rubber Wiring Harness Protector**
- ②Material: EPDM NBR Silicon or Can Custom
- ③Logo: Can Custom
- ④Size: Can Custom
- ⑤Can Custom: Black or custom
- ⑥Application: Automotive
- ⑦Certifications: IATF16949 ,ISO14001:2015,ROHS,CMC, etc
- ⑧Delivery: 30 -50days after sample confirmation
- ⑨Sample: 25-30 days
- ⑩Payment: 30% deposit, 70% payment before shipment
- ⑪Package: PE bags, Cartons,Pallet
- ⑫Payment Terms: T/T,L/C and so on.
- ⑬Shipment Way: Vessel,Air,Express etc.

Product Feature AND Application of the Black Rubber Wiring Harness Protector:

① Waterproof sealing effect is the main reason for the use of rubber parts of wire harness, wire harness rubber parts as a car cab and external fluid, gas blocker, it is a good realization of the interior and exterior space isolation, so that the car can keep dry in heavy rain weather.

② The protection function is that the wire in the wire harness can not only be scratched by the metal sheet metal, but also the elasticity of rubber is excellent against the sharp metal impact.

EPDM rubber wiring harness protector is a component that forms a connecting circuit after crimping the contact terminals (connectors) made of copper and wires and cables with plasticized pressed insulators or metal shells outside. Direct exposure of wire harness to humidity or high temperature environment will not only affect the transmission of wire harness signal, or even burn wire harness, resulting in safety accidents. Therefore, it is necessary to protect the automobile wiring harness.
